Introduction

Online style guide 2006

Consistency in both layout logic and graphic treatment is essential in providing the user familiar experiences across all user journeys within the site.

These style guidelines provide a visual framework to ensure future developments of Zopa.com are consistent with the key foundation pages produced.

Although, please note these are only ‘guidelines’ and it is expected that situations will arise when common sense is needed in bending these guidelines responsibly.
Site construction

This chapter tells you about the foundations upon which the Zopa site has been designed.

Featuring the grid systems on top of which page templates have been developed. The ‘Spacing and margins’ details will give you an understanding of how to position items in pages.
Site foundation

The Zopa website will be centrally positioned in all web browsers.

The background colours will expand to fill to the width of the browser window, as shown below.

The measurements below, and throughout this document reference 'pixels'.
Homepage components

01. Header, Primary navigation
02. Visualisation window
03. Columns x 4

Common page components

01. Header, Primary navigation
02. Secondary navigation
03. Content area
04. Promotion spot
05. Promotion spot
Common page grid system
Spacing and Margins

These details will help you place items on the common page grid system.

**Navigation column***

The spacing between objects is always 10 pxl.

The left padding for promotion panel content is always 10 pxl.

The top / bottom padding of promotion panel content is always 20 pxl.

The bottom padding of promotion panels is always 15 pxl (the space beneath button).

**Main column***

The general spacing between objects in the main column is 30 pxl.

If a dotted line separates two objects, 30 pxl spacing is placed either side of the line.

The spacing eitherside of the ‘Next page’ item is 50 pxl.

* Please note the web pages above were designed before the common page grid system was revised to 10 - 212 - 20 - 508 - 10
Look and feel

This chapter gives you an overview of the way the Zopa brand behaves online.

A mixture of guidelines and inspiring words to encourage creativity, will help you when producing new page designs for the site.
Zopa brand marque

The original CMYK colour values of the Zopa marque have been replaced with new vibrant RGB values for screen use.

Borrowing yellow
#F3CF03

Lending orange
#FA8100

82 pxl

58 pxl

Smallest size for screen use
82x58 pixels

Helpful tip
All 3rd party/partner logo’s are rendered in grey scale if placed on a white bg.
Colour palette

The colour palette we have developed for the new Zopa website is constructed from solid, flat colours.

This ‘solid colour’ approach is to be applied to the treatment of all typography and illustrative elements used across the site.

The one exception to this, is the background of the Zopa window on the homepage, where a gradient fill is used to blend Borrowing yellow through to Lending orange.

Borrowing yellow
#F3CF03
R 243
G 207
B 3

Lending orange
#FA8100
R 250
G 129
B 20

About Zopa green
#HB8BC09
R 184
G 188
B 9

Community red
#C70303
R 199
G 3
B 3

My Zopa blue
#2BA1DF
R 43
G 161
B 223

Remember
Keep the palette solid, Do NOT use gradients or soft drop shadows anywhere!
Typography

Below are the principle typography details which will help you set type across the site.

In certain circumstances eg. where ascenders clash with descenders, details such as line height should be altered to best fit the situation.

Page headings are set to 36pt AG Book Rounded medium, with a line height of 34pt. They inherit their section’s colour and are always mixed case.

Supporting headline copy is set to 20pt AG Book Rounded medium, with a line height of 22pt. Always set to a colour value of #B7B3A1, and always mixed case.

Subheadings are also set to 20pt AG Book Rounded medium, it is expected they will not exceed one line. They inherit the section’s colour they placed in, and are always mixed case.

All body copy is set to regular airal 10pt, with a line height of 15pt and colour value of #666666.
Iconography

When developing additional icons please ensure they are in a similar style as the existing icon sets. It’s important that all graphical elements feel part of the Zopa illustration family!

Join Zopa, Registration process icons

Help icons*

Help with Lending

1. Do I have to pay tax on interest I receive?
2. How do I get my money into the Zopa Members’ Lending Account?
3. How should I compare the rates of return?

Community icons*

Zopa loves...

Trust
Such a simple little thing but it gives us all together, friends, lovers, business, country.
When the trust goes, so does the relationship.

* Please note the promotional panels above were designed prior the current grid system on page 7.
Illustration

Here are some tips to ensure your illustrations look and feel part of the Zopa illustration family.

Key principles

• Warm, human, friendly tone of voice.

• Zopa illustrations are constructed of simple shapes, don’t try to put too much detail in!

• When positioned with typography, don’t overcrowd, allow type to breathe.

Colour palette

• Only use and introduce colours that sit in with the Zopa colour palette.

• Don’t confuse the user, use the correct colour to reference the topic / process you’re referring too.
  ie. use the borrowing yellow to visualise borrowing rates.

2D vs. 3D

• Consider how the isometric grid works with your illustration.

• Always use 2D numbers / characters to visualise key rates / figures.
Illustration

Here are some tips to ensure you’re illustrations look and feel part of the Zopa illustration family.

Always...
Try to make pages look interesting.
Bring the content to life!

- Where possible try summarising the page content with a bold illustration in the header.
- If a page is about people, visualise them with a character and photo, a human feel will be added to the design.
- Perhaps the addition of a simple diagram highlighting the steps involved in a process will make for a more engaging page, try incorporating icons too.
- If the page is a really long text heavy page, sprinkle more illustrations throughout the page to help highlight key points.
- Where appropriate use simple graphical devices. For example ticks & crosses to aid the communication of bullet lists.

Don’t forget...

- Make sure your shadows are being cast in the right direction.
- Be consistent, re-use key devices where possible ie. arrows.

Never ever...
Please don’t use dotted line strokes for box outlines!
Promotions

There are three types of promotion spots that have been devised so far for Zopa.com.

1. Help promotion
2. Community promotion
3. Zopa promotion

Promotion placement(s)

All three spots are placed in the left handside column of the common page template*. The Zopa promotions also have an additional spot on the homepage.

The three promotion types can be used in combination of each other, the number and type of which is influenced by the main page content.

1. Help promotions*

The styling of the Help promo spots remain the same across all placements on the site. Panel titles are influenced by the section the panel is placed in.

3 hyperlinks are placed in all help promo spots. Delivering support to the user in a pop up window.

The ‘MORE HELP’ call to action links through to the Zopa Help homepage.

2. Community promotions*

Both the styling and ‘Zopa loves’ titling of the Community promo spot remains the same across all placements on the site.

A single ‘Zopa loves’ is placed in this promo spot.

The ‘MORE ZOPA LOVES’ call to action links through to the Community section of the site.

* Please note the promotional panels above were designed prior the current grid system on page 7.
Promotions

3. Zopa promotions

The subject of Zopa promotions range from Free Bees to Lender bonuses.

The challenge is to create ‘stand out’ for the offer across all executions of the promo. You can use illustration or cut out photography or a combination of both to achieve this, supported by headline text.

The panel’s colour palette, typography and ‘Zopa Promotion’ titling remains the same for all Zopa promotions.

Zopa promotion homepage spot

Zopa Promotion (generic title)

Placement of the image(s)/headline text is ‘beat fit’.

Promo blurb - try to keep this text short and simple, we just need to hook the user.

Partner logo (where possible)

The ‘FIND OUT MORE’ call to action links through to a dedicated promotion page.

![Image proportions](https://via.placeholder.com/150)

- Image proportions
- We don’t have to be literal here, otherwise we wouldn’t be able to see the bees!

The height of the homepage promo spot is flexible, where possible retain the community panel beneath.

Zopa promotion common page spot*

This spot is easily created as it uses the same ingredients as the homepage spot.

* Please note the promotional panels above were designed prior to the current grid system on page 7.
Promotions

Zopa promo landing page*

Here is an example of a Zopa Promotion landing page. The page layout uses a modular structure, which allows you to customise your promotion landing page.

'Jump to page section' menu

Promotion coupon
Large illustration supporting promotion headline text.

Full promotion details,
and calls to action for:
1. Loan calculator
2. Get loan

Loan rates table
A sample of competitors rates

Partner spot
Partner badge, with a link through to partner site(s)

Update
An update on the Zopa / partner relationship

Terms & Conditions

* Please note the promotional panels above were designed prior to the current grid system on page 7.
Forms

Here is a general overview of the details to be used across all of the form pages on Zopa.com

Form example (Join Zopa, step 1*)

Forms are always constructed on white backgrounds across all sections of the site.

Form field labels
Are always identified 20 px from the left margin, and set in bold

Dotted lines
Are used to help focus the user, chunking up the form content.

Text fields
Standard web elements are used.

Form error messaging

An error(s) list is returned beneath a generic graphic title, in the Zopa error red.

Incorrect / Incomplete form section labels are tinted red and an arrow device is used to highlight the error(s) to the user.

* Please note the promotional panels above were designed prior to the current grid system on page 7.
Template samples

A flexible common page grid system has produced a number of different layouts, here is a sample of the templates created during the development of the key foundation pages.

Section landing page*
Lending

Brochureware page*
About Zopa / Who we are

Application page**
Custom lend

Secure page
My Zopa / My Details / My Zopa News

Process page*
Join Zopa

* Please note the promotional panels above were designed prior the current grid system on page 7.

** The featured ‘Custom lend’ page design broke out of the common page grid structure, using the full width of the page.
Interface details

This chapter gives you an overview of the navigation components used across the site.

Included are all the states for both the primary and secondary navigations, as well as the various ‘call to actions’ featured in the key foundation pages.
Primary navigation

The off, on and hover states of the primary navigation are illustrated below.

1. No section selected (all buttons off)

2. ‘Borrowing’ section selected (button on)

3. ‘Borrowing’ section selected, ‘Community’ section hover activated
Secondary navigation

The selected and hover states of the secondary navigation* is illustrated below.

1. ‘How do we make our money?’ section selected

2. ‘How do we make our money?’ section selected, hover state activated for the ‘What do you get for your money?’ section.

* Please note the promotional panels above were designed prior the current grid system on page 7.
Primary calls to action

Please bear in mind these button instances are to be used sparingly, when appropriate.

For example:

1. In a situation that requires a call to action to be prioritised above a number of choices presented to the user at one time eg. section landing page.

2. On a process page where the user needs to be alerted to the next step eg. join zopa registration

For further guidance please see supplied screen designs.

* Please note the promotional panels above were designed prior the current grid system on page 7.
Primary calls to action

Please bear in mind these button instances are to be used sparingly, when appropriate.

For example:

1. In a situation that requires a call to action to be prioritised above a number of choices presented to the user at one time eg. section landing page.

2. On a process page where the user needs to be alerted to the next step eg. join zopa registration

For further guidance please see supplied screen designs.

These button instances will be used on a white background.

These button instances will be used when a primary action needs to placed on a section’s solid colour.

**Community**

- off state
- hover state

**My Zopa**

- off state
- hover state

* Please note the promotional panels above were designed prior the current grid system on page 7.
Secondary calls to action

For further usage guidance please see supplied screen designs.

Generic*

These button instances will be used on a white background, and also grey (F5F4F1) promo boxes eg. 'Zopa help', 'Zopa loves'

Home

These button instances will be used on the cream (FBF9EE) background used by the 'Community' and 'About Zopa' columns on the homepage

<table>
